Computer Networks Undergraduate

PROJECTS

Travel Website

Project Completed! We're excited to share that we've successfully completed our 3rd web development project. This time, we built a Travel Website using HTML, CSS, and JavaScript, focusing on clean design and functionality. It was truly a great learning journey. A huge thank you to my team members for their continuous support, collaboration, and dedication throughout the project!

Student Internship Management System (Java EE Project)

Student Internship Management System (Java EE Project)

- Developed a complete web-based internship management system using Servlets, JSP, JDBC, MVC, and MySQL.
- Implemented session handling, filters, form validations, and AJAX-based dynamic components.
- Designed relational database schema and optimized SQL queries.
- Built functionality for student registration, company management, and supervisor workflows.

Event Management Web Application

Event Management Web Application

- Created a Java Servlet-based web app with HTML/CSS/JS UI.
- Used MVC design pattern to maintain the structure.
- Implemented event creation, registration, and user role management.

Networking & VoIP Labs

- Configured VLANs, routing protocols, DHCP, NAT, and switching.
- Analyzed network traffic using Wireshark.
- Studied VoIP call flow, codecs, SIP messages, and RTP streams.
- Applied QoS techniques to reduce latency, jitter, and packet loss.

Achievements

- Configured VLANs, routing protocols, DHCP, NAT, and switching.
- Analyzed network traffic using Wireshark.
- Studied VoIP call flow, codecs, SIP messages, and RTP streams.
- Applied QoS techniques to reduce latency, jitter, and packet loss.

Career Objectives

To secure an internship or entry-level IT position where I can apply my skills in software development, networking, and problem-solving, while gaining practical industry experience and contributing to meaningful projects.

About Me

Motivated and detail-oriented IT undergraduate from NSBM with hands-on experience in Java web application development, networking concepts, and system design. Skilled in Java EE, Servlets, JSP, JDBC, SQL, and front-end technologies, with additional knowledge in VoIP, cybersecurity, and packet analysis. Strong problem-solving ability, quick learning, and a passion for building efficient, user-focused solutions. Seeking an internship or entry-level opportunity to apply technical skills and contribute to real-world software or network engineering projects.

Education

Computer Networks

NSBM Green University

2023 - 2027

Skills

- Java, Java EE (Servlets, JSP, JDBC)
- Web Application Development (MVC, AJAX)
- HTML, CSS, JavaScript
- Critical Thinking
- Leadership
